

To the 1st year Students
of the Master Degree in Medical Biotechnologies

Novara, November 19th, 2014

Dear Student,

The “Laboratories Presentation Day” has provided you with the range of options for your lab internship and thesis project. You are now supposed to contact the professors whose laboratories you may have selected, discuss their availability to host your internship and thesis project, and make your final choice.

Enclosed is the form that you have to fill, *in agreement with your Thesis Mentor*, to formalize the choice of the laboratory for your Thesis Internship. You will then need to submit the form (in paper or signed pdf) to the “Didactical Office” located on the 1st floor of Palazzo Bellini (Stefania Perasso at stefania.perasso@med.unipmn.it or Daniela Gentile at daniela.gentile@med.unipmn.it) *by December 31st, 2014*.

The evaluation and final approval of your projects of internship and thesis will be made by the “Didactical Committee” of the Master Degree in early January 2015.

Please do not hesitate to contact me or the Didactical Office for any questions regarding this issue.

Sincerely,

Gianluca Gaidano, MD, PhD
Director, Master Degree in Medical Biotechnologies
